Ernakulam, Kerala | [linkedin.com/in/mable-simon-](https://www.linkedin.com/in/mable-simon-) | github.com/Mable987 | Portfolio

PROFILE

Entry-level Full-Stack Developer specializing in Python/Django backends. Hands-on experience designing REST APIs and server-rendered applications with Django, implementing JWT-based authentication, role-based access control, and third-party payment integration (Razorpay). Built and shipped a full-stack, role-based booking platform end-to-end – from data modeling and authentication through a redesigned, polished UI. Comfortable across the stack: PostgreSQL/MySQL schema design, debugging, and Git-based collaborative workflows. Looking to bring this end-to-end ownership to a software development team.

SKILLS

Languages: Python, JavaScript, SQL

Backend: Django, Django REST Framework (DRF), REST API Design, ORM, JWT Authentication, Role-Based Access Control

Frontend: JavaScript (ES6+), HTML, CSS, Bootstrap, React (learning)

Databases: PostgreSQL, MySQL, SQLite

Tools & Integrations: Git, GitHub, Postman, Razorpay Payment API, VS Code

Soft Skills: Problem Solving, Debugging, Communication, Team Collaboration, Adaptability, Time Management

EXPERIENCE

Python Full-Stack Developer Trainee

Luminar Technolab

Aug 2025 – Apr 2026

Kerala, India

- Completed intensive hands-on training in Django and REST API development, building multiple full CRUD applications with authentication.
- Designed and debugged backend logic for web applications, using SQL queries for data validation and issue troubleshooting.
- Tested and validated REST APIs using Postman, identifying and resolving backend defects before deployment.
- Collaborated using Git and GitHub for version control, following standard software development lifecycle practices (debugging, testing, code review).

PROJECTS

TurfHub | Django, Bootstrap, JWT Auth, Razorpay | Live Demo

Feb 2026 – Present

- Built a role-based turf/sports-ground booking platform (User, Owner, Admin) using Django, fixing deduplication, security, and data-loss bugs in the booking flow along the way.
- Implemented JWT-based authentication and role-based access control across all three user roles, closing a pre-existing unauthenticated edit endpoint in the process.
- Redesigned the signup/login flow with a split-screen layout and a Playo-style avatar picker (8 illustrated character avatars plus custom upload), integrated into both onboarding and the user profile page.
- Built booking validation logic to prevent overlapping/double reservations, plus review and rating functionality for turf evaluation.
- Integrated Razorpay for end-to-end payment processing (order creation, verification) and added a user Account page with avatar upload and profile editing.

PhoneNext | Django, Bootstrap | Live Demo

Feb 2026

- Developed backend logic for an e-commerce platform, including authentication, cart management, and order workflows.
- Designed database models and implemented dynamic product search using Django ORM.
- Built REST APIs for product listing and cart operations, with session management and secure access control.

EDUCATION

B.E. Computer Science and Engineering

Good Shepherd College of Engineering and Technology

2021 – 2025

Tamil Nadu

COURSES AND CERTIFICATIONS

Machine Learning Internship — iStudio

Completed hands-on training in supervised learning, data preprocessing, and model evaluation using Python.

Aug 2024

Cloud Services Management — Oracle, Naan Mudhalvan Scheme

Jul 2025
